SCAT has designed a shelter on Bee Ridge Road at Mauna Loa on the north side of the roadway. The design is complete and being forwarded for permitting and construction. Alexander J. Boudreau, P.E., is the project manager for the construction. Mr. Boudreau can be contacted regarding the construction schedule.

During the design of the bus stop the Florida Department of Transportation, SCAT's funding partner for bus stop improvements, provided recommendations for pedestrian improvements and bus stop access for the SCAT bus stop on the south side of Bee Ridge Road at Mauna Loa. SCAT is adding the location of the south side to a preliminary list of bus stop projects now being considered for design.

Please contact me if you have any questions. My telephone number is 650-2284.

Ms. Blanchard,

Can you offer an update on the Bee Ridge / Mauna Loa bus shelters?

Thanks,
