It was nice to see you at the County Commissioner chambers last week.
Adding to Brenda's note, I offer additional information:

SCAT has forwarded the Bee Ridge and Mauna Lao location as a priority project to our design engineers. SCAT will work with the engineers to obtain a survey of the area (there may already be a survey, and we won't need a new one). As Brenda mentioned, we'll coordinate with Health South to identify the best location for a bus stop at this intersection. In light of the future Bee Ridge road project, staff is considering whether to locate a bus stop on each side, or just one on the north side that would serve both directions.
Thank you again for your continuing support!

The bus is able to maneuver the u-turn on Mauna Loa. Sarah and I are working on the best location for the shelter. We are contacting Health South for their thoughts and possibly land contribution to this effort.

Ms. Miller,

I am following up on my meeting with SCAT officials and staff on August 16, 2006, in which we discussed providing ADA compliant stops and shelters along SCAT route 14 east of I-75.

I understood that a shelter located on Mauna Loa just north of Bee Ridge Rd. was firstly contingent upon a bus successfully completing a

u-turn maneuver on Mauna Loa and that you gave a commitment to have such a maneuver attempted.

May I ask what was the outcome? I would like to continue pursuing a shelter at this location, but need to know if a bus can make the required u-turn.
