A construction date has not yet been scheduled. And SCAT is stretching out the project, in part due to funding considerations. The first half of "Batch 3" projects have been forwarded for construction cost estiamting and are moving into permitting and construction scheduling. This half includes only projects that were 100% designed. The approximate cost for these stops is $67,000.

The second half fo the project includes the remaining locations identified in Batch 3, such as the Bee Ridge at Mauna Loa bus stop, that requir additional now underway. Once the design is complete, the projects will be forwarded for construction cost estimates, permitting, and finally scheduling.

I will keep you appraised. I appreciate your forwarding an inquiry from time to time. Thank you.

Ms. Blanchard,

Thanks for the update.

I know the wheels of government turn slowly, but is there an estimated completion date for the design work? We really need an accessible bus stop east of I-75.

Thanks
